The seven-day-a-week Devon Eurovette

The seven-day-a-week Devonette

Now look inside...

Inside the Eurovette

The Eurovette is a quality motor caravan based on the Volkswagen Kombi. The elevating roof, designed by Devon, provides two full-length bunks. The daytime seating converts into a luxurious double bed to sleep two adults. And the Eurovette has all the following

features as standard. The Devon patented swing-out cooker with two burners and a grill; stainless steel sink unit with electric/manual pump; food cooler compartment; good storage space for food, luggage, bedding and clothes; a table for use inside or out; an

interior fluorescent light; louvred window. Among the many optional extras are a refrigerator, child's bunk and drive-away tent. The Eurovette is also available without the Devon elevating roof. Details and specifications can be found on the back page.

Inside the Devonette

The Devonette is the latest addition to the Devon range. Choose from two models.

THE DEVONETTE STANDARD has been designed to include the essential features for comfortable motor caravanning at a lower cost. It is based on the Volkswagen van, to which windows are expertly fitted by Devon Conversions. It includes the Devon patented swing-out cooker with two burners and a grill. The daytime seating folds to a large double bed in seconds.

THE DEVONETTE DE LUXE is based on the Kombi and is fitted with a Devon elevating roof, which provides an extra two full-length bunks. Standard features include a swing-out cooker with two burners and a grill; good storage space for clothes, bedding and luggage; a dining table for use inside or out; interior fluorescent light; louvred window and vinyl/fabric upholstery. A number of optional extras are also available. Details and specifications can be found on the back page.

The Continental

The Volkswagen Continental, imported from West Germany, is a luxury motor caravan with a stainless steel cooker, pumped water supply, food cooler box and a full-length wardrobe among its standard fittings. Furnishings are particularly luxurious with wall-to-wall carpeting, birch-ply wall and

ceiling panels plus high-quality cabinet work in a mahogany laminate finish. Also standard is a self-locking elevating roof, opening towards the front for more headroom. Within the elevating roof is a comfortable double bed. Details and specifications can be found on the back page.

The Devon Drive-Away Tent

Quality made by S.T. Harrison of Bristol. Fixes easily on to your vehicle with a clip on double plastic channel and two elastic cords. Drive away, and you leave a completely enclosed, self-supporting tent on a tubular frame, which will keep your site reserved for you.

There are two side windows with curtains to give you complete privacy. The front wall can be raised to form a sun canopy (two spiked poles provided with guy ropes and pegs) or rolled up and held by tie tapes. The floor area is

approximately 10ft x 6ft 6ins (65 sq ft).

Mudwalls are easy-clean plastic over a strong synthetic frame. All the zips are of high-quality polyester on white proofed tape.

The Devon Drive-Away Tent includes curtains, gylines and pegs. Plus a bag for the canvas section and one for the framework.

A groundsheet is also available.

Devonette Standard		On this model, Devon Conversions reserve the right to vary colour specifications according to material available.			

Devon Elevating Roof

Our patented weatherproof elevating roof has been designed by us and is made entirely in our own factory. It has a heavy duty fibreglass top with 2 air vents and reinforced plastic sides. The headlining incorporates a hardboard and expanded polystyrene insulation sandwich, minimising noise, vibration and condensation. Elevation and retraction are assisted by

spring loaded metal tubing fixed to a double metal frame. Rigidity supports and safety catches are included.

The roof also incorporates 2 full length bunks slung on unique and ingenious metal bracket supports. Both the bunks stow away inconspicuously when not in use. The photo also shows the useful extra locker space below the elevating roof.
